

RICCAR Heating and Cooling

RICCAR Heating and Cooling

Want lower utility bills? Stop by RICCAR for insightful analysis.

After 36 years, Riccar Heating and Cooling continues to offer top-notch service because of its experienced staff, quality products and workmanship. Riccar has designed and installed heating, cooling, ventilation and radiant heating in over 15,000 new homes and countless businesses. They also have provided retrofit and repair services to thousands more residential and commercial customers.

Riccar is pleased to announce that they are one of the first HVAC companies in Minnesota to become State Certified Energy Auditors. This enables us to perform a Weatherization analysis of your home by use of the infrared images and a full computerized blower door test.

With the above services, Riccar's staff can design and provide our customers with the economical way of improving the energy efficiency, comfort and safety of their homes and environment.

Riccar's total staff experience equals more than 190 years. The company was founded in 1972 by Jeff Arent, Sr. and James Renner. Jeff Arent, Sr., former CEO passed away January 2 at the age of 65. He will be sorely missed by the Riccar staff, customers, friends and family.

Riccar is conveniently located off Coon Creek Boulevard and one block south of Bunker Lake Boulevard at 2387 Station Parkway NW in Andover. The showroom is open from 7 a.m. to 5 p.m., Monday thru Friday.

Energy efficiency

The Federal Stimulus package passed in February of this year includes provisions to encourage homeowners to improve the energy efficiency of their homes. Customers can receive a tax credit of up to 30% of the installed price of high efficiency heating and cooling equipment installed in 2009 and 2010.

Riccar also provides Energy Savings Agreements which provide scheduled maintenance on the equipment we provide. Under these plans, Riccar technicians will come out at least twice per year (spring and fall) to inspect and test all of your installed HVAC equipment. This service will help prolong the life of your equipment and keep it running at maximum efficiency. It also provides these customers with added savings on other services that Riccar provides.

Riccar engineers are also able to design and provide geothermal systems for your home. These systems are a form of renewable energy and also qualify for the Federal tax credit.

Riccar also has a duct cleaning division. Riccar uses state of the art equipment to clean the air ducts in your home. This service helps to eliminate allergy, asthma and respiratory problems as well as keep your equipment running at top efficiency.

Quality products

For the past three years, Riccar has received the Rheem Recognized Top Contractor award, which is given to only two Rheem contractors in Minnesota each year.

What makes this accomplishment even more special is the name behind the award.

Rheem has been consistently recognized by consumer report publica-

tions as one of the best furnace manufacturers. It presently holds the number one ranking for the fewest repairs.

Various financing packages are available for Rheem products such as a standard five-year warranty or upgrade to a 10-year warranty.

Other products Riccar sells have warranties that range from one to five years. The company carries Honeywell, Venmar, Wirsbo Radiant Floors, Weather King, Modine, BreathClean, Panasonic and Reznor products.

Riccar gives a free in-home estimate or will go to a business owner's office complex to give them a first-hand estimate of what specific product they need and how much installation would cost.
