Select Senior Living offers worry-free living

The new Coon Rapids facility offers comfort and 'A Lifetime of Caring' for those seeking assisted living or memory care housing

From its welcoming entryway with cozy chairs, warm lighting and inviting colors to its outdoor patio, library and media room, Select Senior Living offers a caring environment for its residents.

The assisted living and memory care apartment complex, located at 11350 Martin St. N.W. in Coon Rapids, offers residents and their families worry-free living in a caring and warm place where old friendships are renewed and new ones are created.

Select Senior Living, which opened its first building in February 2008, is committed to providing customer-driven services tailored to each resident's needs. It celebrated the grand opening of its second building March 10.

"It's a safe comfortable environment for family and the tenants themselves," said Kelly Myers about Select Senior Living's services. "They don't have to worry about cutting the grass anymore or shoveling snow."

A licensed RN assesses each individual before moving in to provide a personal care package that's right for each person.

Individual service plans are available and are designed to help residents maintain their independence while providing necessary services and peace of mind.

Assisted living units includes one and two bedroom units and studio apartments.

Most of the assisted living units include a deck or patio and half feature in-unit washers and dryers. Some units even include a fireplace.

Services and amenities included in the monthly rent are a 24-hour emergency call system, daily OK checks, a health and wellness program, three daily meals, programs and activities for socialization, daily afternoon coffee and cookies and complimentary laundry facilities.

There is also weekly housekeeping and van transportation included in the monthly rental fee.

Utilities are also included in the rent, with the exception to social outings of telephone and cable service.

Other features available for an additional fee include a personal service plan, heated underground parking, beauty and barber shop services, meal delivery and housekeeping and laundry services.

There are daily events planned, which include bingo, cards, exercise classes, wellness clinics and other activities.

These activities provide residents with an opportunity to meet their neighbors, strike up friendships and share similar interests.

"It's wonderful for tenants who have lived alone to interact with people who have similar experiences," Myers said.

The secured memory care apartments include studios and one-bedroom units.

These memory care units have their own kitchen, dining and gathering space and a secured outdoor courtyard area. Activities geared toward individuals with memory care issues are offered daily as well.

An open house event, featuring a pancake breakfast, is planned from sometime in April to welcome not only residents and their families to the complex but also to invite the community to see the facility for themselves.
